DENR, muling nanawagan sa tamang pagtatapon ng gamit na face mask

Mayo 8, 2021 12:28pm GMT+08:00
; UPDATED Mayo 8, 2021 12:41 PM GMT+08:00

Nanawagansa sa publiko ang Department of Environment and Natural Resources (DENR) hinggil sa tamang pagtatapon ng mga gamit na face mask upang maiwasan ang panganib ng coronavirus disease 2019 (COVID-19) transmission habang patuloy na umiiral ang pandemya.

“Protection against COVID-19 goes beyond following the minimum health protocols and the use of face masks and face shields. Our responsibility extends to the disposal of these healthcare items which are potentially contaminated,” ayon kay DENR Secretary Roy Cimatu.

Sa isang press statement binigyang-din ng DENR chief ang kahalagahan ng responsableng pagtatapon ng COVID-19 litter lalo na ang gamit na disposable face masks dahil sa panganib na idinudulot nito sa terrestrial and aquatic animals.

“We have seen that while face masks protect us, these have become the newest threat to animal life because of entanglement, and have added up to marine litter,” ani Cimatu .

Samantala, sinabi naman ni DENR Undersecretary for Solid Waste Management (SWM) and Local Government Units (LGU) Concerns Benny D. Antiporda, isang COVID survivor, na mahalaga ang pakikibahagi ng bawat pamilya sa tamang paghihiwalay ng gamit na face masks sa ibang solid wastes.

"We never thought that these healthcare wastes will end up at our doorsteps. Before, these items are just found in operating rooms of hospitals. So, let's put our used face masks in a separate container and properly label it as household healthcare wastes, even specifically indicating it as face masks," saad ni Antiporda sa isang radio program noong isang linggo.

Ayon pa kay Antiporda, pinaalalahanan na nila ang LGUs na ihiwalay ang medical wastes sa paghakot pa lamang para sa proper treatment ng mga ito sa sanitary landfills.

Sa naturang programa, muli din nitong hiniling sa publiko na itigil ang paggamit ng single-use-plastics.

"Coffee stirrers can be replaced with biodegradable alternatives such as popsicle sticks. On the other hand, softdrinks are already in plastic bottles, so why use plastic straws? You're only adding insult to injury," dagdag pa ni Antiporda.

Sinabi pa ng opisyal na ang plastic coffee stirrers at plastic softdrink straws ay idineklarang non-environmentally acceptable products ng National Solid Waste Management Commission (NSWMC) noong Pebrero 2021.

"I call on the businessmen producing these two plastic items to divert to other products much more necessary to the public instead," apela ni Antiporda na siya ring alternate chair ng NSWMC.

"There is some resistance from other government agencies but we will abide by the call of the President to ban unnecessary, single-use plastics," aniya. —**Boy Celario/LBG, GMA News**

TAMANG PAGTATAPON NG FACEMASK MULING PINANAWAGAN NG DENR

written by **Agustina Nolasco** May 8, 2021

Umapela ang Department of Environment and Natural Resources (DENR) sa taong-bayan na itapon sa tamang basurahan ang mga gamit na face mask bilang pag-iwas na rin sa panganib na pagkahawa sa COVID-19 at pangangalaga sa kalikasan.

Ayon kay DENR Secretary Roy Cimatu, mapanganib sa mga terrestrial at aquatic animals ang mga basura gaya ng mga face mask na humahalo na sa mga yamang tubig ng bansa.

Sa pahayag naman kay DENR Undersecretary for Solid Waste Management (SWM) at Local Government Units (LGU) Concerns Benny D. Antiporda, mahalaga ang gampanin ng bawat pamilya sa pagbubukod ng gamit na face mask at iba pang basura.

Dagdag ni Antiporda, inatasan na nito ang mga LGU na ibukod ang mga medical wastes sa paghahakot pa lamang upang maayos ito sa sanitary landfills.

Kontaminadong face mask delikado – DENR

By Abante News Online — Last updated May 8, 2021

NEWS

Muling umapela sa publiko ang Department of Environment and Natural Resources (DENR) sa tamang pagtatapon ng ginamit na face mask upang maiwasan ang panganib ng hawaan habang patuloy pa ang pandemya ng COVID-19 sa bansa.

Ayon kay DENR Secretary Roy Cimatu, responsibilidad ng bawat indibidwal na hindi lamang proteksyonan ang sarili laban sa COVID-19 kundi maging responsible rin dapat sa pagtatapon ng mga health care item katulad ng face mask na maaaring magdulot ng kontaminasyon.

Ginawang halimbawa ng kalihim ang mga face mask na natatagpuan sa katubigan o karagatan na nagdudulot ng panganib para sa mga aquatic animal. (Riz Dominguez)

Itinatapong face mask, sanhi ng pagkalat ng COVID

PHOTO: Getty Images

Nananawagan sa publiko si Department of Environment and Natural Resources (DENR) Secretary Roy Cimatu hinggil sa tamang pagtatapon ng mga ginamit na face mask upang maiwasan ang hawahan sa lumalaganap na COVID-19.

Aniya, "Protection against COVID-19 goes beyond following the minimum health protocols and the use of face masks and face shields. Our responsibility extends to the disposal of these healthcare items which are potentially contaminated."

Dagdag pa niya, "We have seen that while face masks protect us, these have become the newest threat to animal life because of entanglement, and have added up to marine litter."

Matatandaang iniulat ng Greenpeace na mahigit 129 bilyong disposable face masks ang nakokolekta sa buong mundo kada buwan, kaya inirekomenda nila ang paggamit ng reusable face masks at personal protective equipment (PPE) upang mabawasan ang mga basurang nagko-contribute ng polusyon sa mundo at ang pagiging carrier nito ng virus.

Sa ngayon ay mahigit na ipinatutupad ang tamang pagsusuot ng face mask at face shield bilang health protocols.

Segregation garbage bins to be provided to barangays to further boost the waste management in their areas. (PIA ICIC)

DENR EMB calls for cooperation on waste segregation in Marawi

By Lou Ellen L. Antonio Published on May 8, 2021

MARAWI CITY, May 9 (PIA)--As the city government steps up its efforts for solid waste management, the Department of Environment and Natural Resources - Environmental Management Bureau called for the cooperation of residents for waste segregation.

DENR-EMB Region 10 focal person Abbas Lao urged the different households in the city to support the government by segregating their garbage for the effective collection and disposal of solid waste.

Lao echoed his call during Friday's episode of Kalilintad Andaka program of DXSO Radyo Pilipinas Marawi.

"Hinihingi po natin sa mga kababayan natin na magcooperate sila sa program natin kasi one of the very important components of solid waste management is the cooperation of the different household. Yung pagmamana sa basura natin kung pwede po strictly iimplement nila ang segregation," said Lao.

[We call on the residents to cooperate in our program because one of the very important components of solid waste management is the cooperation of the different households. They should strictly implement the management and segregation of wastes.]

As part of its information campaign, the agency also capacitated the residents in each barangay on proper waste segregation. Segregation garbage bins will also be provided to further boost the waste management in their areas.

The central material recovery facility in Barangay Dulay is also set to be inaugurated this month. This facility will cater to non-residual waste which can be recovered or recycled while the bulk biodegradable waste will be catered through the sanitary landfill to be constructed in the boundary of Malimono in the city and Kasayanan of Kapai town.

With funds from the National Disaster Risk Reduction and Management – Marawi Recovery, Rehabilitation, and Reconstruction Program, DENR also procured five quarter dump trucks, nine mini dump trucks, two units six-wheeler garbage collector, nine skid loaders, one case crawler-type excavator, one waste handling dozer, one vibratory roller, and two wheel-type excavators. (LELA/PIA ICIC)

Like migratory birds, let's sing, fly, and soar with nature

By ACB Published on May 8, 2021

erns stop over the Tubbataha Reefs National Park, one of the internationally important wetlands in the East Asian-Australasian Flyway for migratory birds. Photo by Lene and Claus Topp.

LAGUNA, May 8 -- The COVID-19 pandemic continues to impact many countries, slowing down economies and grounding social activities, including work and leisure. The anthropause, or the slowing down of human activities at the onset of the COVID-19 pandemic has afforded us time to reflect on the innate link between human and nature.

This year's World Migratory Bird Day theme, "Sing, Fly, Soar – like a Bird" reminds us to connect with nature and wildlife, particularly the migratory bird species. The theme highlights the "bird song" and "bird flight" phenomenon that people from around the world appreciate, thus, making the conservation of these species a collective endeavour.

Migratory birds are our unsung heroes – they pollinate and disperse seeds, they help regulate pests and diseases; and their majestic beauty enriches the culture in the communities around the ecosystems they thrive in. The diversity of migratory bird species that visit key biodiversity areas play key roles in ensuring the integrity of ecosystems from which we derive vital services, such as food, water, and medicines. Their ability to transcend boundaries make them effective "global ambassadors of nature" for linking ecosystems and strengthening cooperation across the lands and the people within their flyway.

Listening to bird songs and watching them take flight connect us with nature, despite the limited mobility during the pandemic. They have become our "antidote" to the stresses and pressures and scientists are now looking into establishing the linkage between emotional and mental well-being and birds and nature.

Despite the valuable ecosystem services provided by migratory bird species, their population continues to decline and be threatened due primarily to hunting, illegal wildlife trade and destruction of their habitats and important ecosystems. In the ASEAN region, 70 migratory species from a total of 510 have been listed as critically endangered, endangered, vulnerable and near threatened, according to various global data sources. Meanwhile, a study by Ding Li Yong, et al, an international team of conservationists and researchers, says "at least 180 species" along the East Asia-Australasia Flyway are being hunted and trapped for food and illegally traded as pets.

It is important to recognise the intricate link between migratory bird species and the well-being of the people. A study by the Asian Development Bank emphasises that more often, the total economic benefits derived from keeping the species alive in their natural habitats, in terms of their ecological functions and ecotourism contribution, among others, outweigh the monetary value that may be obtained from their direct use in illegal trade.

The ASEAN Centre for Biodiversity has been engaged in various conservation and education programmes in support of the ASEAN Member States (AMS). The ASEAN Heritage Parks (AHP) Programme for one, strives to protect and manage the ecosystems that serve as important feeding and watering sites of migratory birds such as the Indawgyi Wildlife Sanctuary park and Meinmahla Kyun Wildlife Sanctuary in Myanmar; Tubbataha Reef Natural Park in the Philippines; and Sungei Buloh Wetland Reserve in Singapore. The AHP Programme supports the capacity development of the park management – providing assistance in training and equipment that can aid in their patrolling and law enforcement – as well as providing alternative livelihood support for the communities around the AHPs.

With the ASEAN region at the heart of the East Asian-Australasian Flyway, the ASEAN Flyway Network (AFN) was established with the aim to facilitate cooperation among the member states, flyway site managers, and local, national, and international partners on the conservation of wetland habitats and migratory waterbirds. With the support from the government of Japan through the Japan-ASEAN Integration Fund, studies have been conducted in designated and potential flyway sites to augment the data needed to scale up migratory bird species conservation measures in the region.

The essence of the World Migratory Bird Day celebration is to link and unite stakeholders to a common goal of conserving ecosystems and protecting migratory bird species. The ACB joins this important global event and remains fully committed to supporting the AMS and fostering regional and international collaboration to ensure the survival of migratory bird species.

Let us allow the birds to sing their songs, soar freely, and thrive without threats to their existence. Let us recognise and treasure our wonderful connection, and fortify our resolve to continue to protect and conserve biodiversity.

This World Migratory Bird Day, let us "Sing, Fly, Soar -- like a Bird!"

Umawit, lumipad, sumalimbay gaya ng isang ibon! (Dr. TMSLim/ACB)

DOE, UNDP discuss continuing partnerships on renewable energy dev't and climate finance in PH

By DOE Published on May 8, 2021

TAGUIG CITY, May 8 -- Energy Secretary Alfonso G. Cusi and United Nations Development Programme (UNDP) Resident Representative Selva Ramachandran on Tuesday (May 4) discussed the continuing partnerships on Renewable Energy development and Climate Finance in the Philippines.

During the virtual meeting, Energy Undersecretary Emmanuel P. Juaneza informed the Secretary that the UNDP has extended the Development for Renewable Energy Applications Market Mainstreaming and Sustainability (DREAMS) Project's duration from July 2021 to January 2023.

In his remarks, Secretary Cusi emphasized the need for the Department of Energy (DOE) and UNDP to work together towards Climate Justice. This includes securing investments to attain the policy directive on 100% household electrification by 2022, and crafting policies and programs that will eventually lead to increase utilization of renewable energy and lower cost of electricity among household consumers. (DOE)

Further warming promotes emergence of infectious diseases

May 8, 2021 3 min read

MANILA – Two experts have raised the urgency for mitigating greenhouse gas (GHG) emissions, warning that more infectious diseases would emerge if global warming intensifies.

“The latest climate science already warned us that (a) higher degree of global warming would lead to (the) emergence of new infectious diseases,” Climate Change Commission (CCC) Vice Chairperson and Executive Director Emmanuel de Guzman told participants of the climate change expenditure-tagging webinar organized for local government units (LGUs) nationwide by the commission and the Department of the Interior and Local Government and held this month.

De Guzman said GHG emissions are further warming the Earth and changing the climate, as these discharges continue to accumulate in the atmosphere and trap heat.

Scientist and University of the Philippines professor, Dr. Rodel Lasco, said new studies indicate disease outbreaks are becoming frequent.

Lasco said scientists attribute the shortening of the interval between outbreaks to the complex interaction among virology, biodiversity, changes in the climate, poverty, food safety, and population growth.

“I hope we can see there’s a wider connection out there,” he said during the webinar.

Findings of a study he presented during the webinar linked the Zika virus to GHG emissions and climate change.

Earlier, the World Health Organization (WHO) reported an apparent increase in infectious diseases, including several newly circulating ones.

This increase reflects the combined impact of rapid demographic, environmental, social, technological, and other changes, the WHO said.

“Climate change will also affect infectious disease occurrence,” it added.

The webinar oriented LGUs on the process of identifying and tagging respective climate change-related initiatives in annual investment programs.

The process aims to help mainstream climate change adaptation and mitigation in LGUs’ target annual budgets.

Difficulties arising from the onslaught of various infectious diseases are among the reasons for making mainstreaming essential, de Guzman said.

“We’re now all grappling with the effects of one such disease,” he said, referring to the coronavirus disease 2019 (Covid-19), which continues to plague countries worldwide.

De Guzman said countries could no longer afford to further increase GHG emissions.

“Returning to business as usual, therefore, is not an option,” he said.

The way forward, he said, is to instead “heed science and make decisive action towards a greener and more sustainable economic system.”

The CCC’s programs aim to help build climate resilience nationwide and a sustainable economy for the country.

First reported in China, Covid-19 evolved into a pandemic, prompting countries to impose quarantines and lockdowns.

The Department of Health has reported nearly 1.1 million Covid-19 infections in the Philippines as of May 7, with 66,626 active cases. (**PNA**)

Coronavirus cases in Philippines climb to 1,094,849

(Philstar.com) - May 8, 2021 - 4:00pm

MANILA, Philippines — Health authorities on Saturday reported 6,979 additional COVID-19 infections, bringing the national caseload to 1,094,849.

- Active cases: 63,376 or 5.8% of the total
- Recoveries: 10,179, pushing total to 1,013,204
- Deaths: 170, bringing total to 18,269

What's new today?

- The government's pandemic task force has [allowed](#) point-to-point air travel from the so-called "NCR Plus" area for leisure purposes in a bid to revive economic activity in tourist destinations that took a major blow due to the pandemic.
- The Food and Drug Administration Friday [granted](#) a local pharmaceutical company's application to register its ivermectin for human use, paving the way for it to be manufactured, distributed and sold.
- The drug, however, is indicated as anti-parasitic and is still not registered for the prevention or treatment of COVID-19.
- The government needs P20 billion to [fund COVID-19 vaccine procurement](#) this year and another P90 billion for next year, officials leading the pandemic response told senators Thursday night.
- Minors aged 15 to 17 and citizens age 65 and above are now [permitted](#) to leave their homes, but only to register for the Philippine Identification System, Malacañang said Friday.

Patay sa COVID-19 sa Pilipinas humigit na sa 18,000

(Philstar.com) - May 7, 2021 - 4:00pm

Food buyers observe public health protocols by wearing face mask inside Marikina Public Market on Thursday, May 6, 2021.

The STAR/Michael Varcas

MANILA, Philippines – Nakapagtala ang Department of Health ng 7,733 bagong infections ng coronavirus disease, Biyernes, kung kaya nasa 1,087,885 na sumatutal ang nahahawaan nito sa bansa.

Batay sa mga bagong nakalap na datos ng Kagawaran ng Kalusugan, narito ang bagong mga pasok na datos para araw na ito:

- **Lahat ng kaso:** 1,087,885
- **Nagpapagaling pa:** 66,626, o 6.1% ng total infections
- **Kagagaling lang:** 4,227, dahilan para maging 1,003,160 na lahat ng gumagaling
- **Kamamatay lang:** 108, na siyang nag-aakyat sa total local death toll sa 18,099

Anong bago ngayong araw?

- Itutuloy na uli ng DOH ang pagtuturok ng AstraZeneca COVID-19 vaccine para sa lahat ng age groups na saklaw ng vaccination program ng gobyerno (18 pataas). Matatandaang pansamantalang sinuspindi ang pagtuturok nila para sa mga wala pang 60-anyos dahil sa mga rare cases ng "blood clotting" dahil sa Vaccine-Induced Thrombosis and Thrombocytopenia.
- [Nasa 12 tripulanteng Pilipino naman lulan ng barkong barkong MV Athens Bridge](#) ang nagpositibo sa COVID-19 matapos magawi sa bansang India. Kahit may travel ban ang Pilipinas sa lahat ng biyahero mula sa South Asian country dahil sa "mas nakahahawang" B.1.617 COVID-19 variant, sinaklolohan sila ng gobyerno at iniuwi sa Pilipinas. Dalawa sa kanila ang kritikal.

- [Ipinatatawag ng Bureau of Customs sa pamamagitan ng summons](#) ang "importer under investigation" na nag-misdeclare ng nasa 20,000 unregistered ivermectin tablets na ginagamit ngayon ng ilan laban o pangontra sa COVID-19. Kinilala ang kumpanya bilang Finstad Inc., na sasailalim sa preliminary hearing sa susunod na linggo.
- Inaprubahan naman na ng Inter-Agency Task Force for the Management of Emerging Infectious Diseases ang rekomendasyong [iusog sa ika-pitong araw ng quarantine ang swab tests ng mga inbound travelers](#). Bukod diyan, hindi na rin daw kinakailangang i-test para sa COVID-19 ang mga pashero sa kanilang arrival.
- [Hindi naman ioobliga ng Philippine Basketball Association](#) ang kanilang mga manlalaro't kawani na magpabakuna laban swa COVID-19. Ito ang sinabi ni PBA commissioner Willie Marcial habang kinokontrata nila ang mga local government units na i-host ang kanilang "bubble training" ngayong nananatiling suspendido ang 46th season ng liga dahil sa pandemya.
- Umabot na sa 154.81 milyon ang tinatamaan ng COVID-19 sa buong daigdig, ayon sa huling datos ng [World Health Organization](#). Sa bilang na 'yan, patay na ang mahigit 3.23 milyong katao.

Almost 200k Pfizer doses to arrive on Monday - Duque

By JOAHNA LEI CASILAO, GMA News

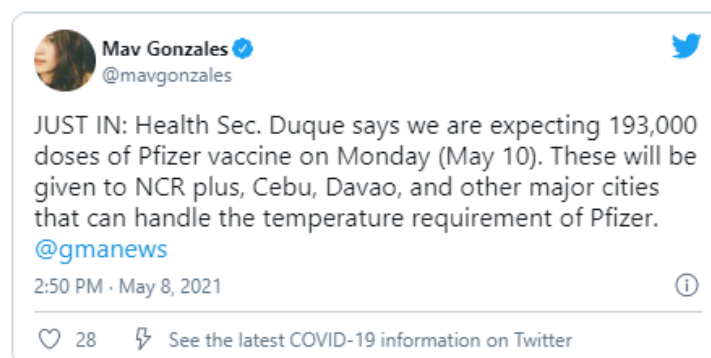

The Philippines is expecting around 193,000 doses of the Pfizer COVID-19 vaccine on Monday, Health Secretary Francisco Duque III said Saturday.

Duque said the vaccines will be given to the NCR Plus – composed of the National Capital Region, Bulacan, Cavite, Laguna, Rizal – as well as Cebu, Davao, and other major cities that can handle the temperature requirements of Pfizer.

The largest real-world study of the Pfizer vaccine confirmed that the jab provided more than [95 percent protection](#) against COVID-19.

However, it also found that the level dropped significantly when people received just one of the two prescribed doses.

According to the Health Secretary, the Philippines is also set to receive 1.1 million doses of Pfizer from the COVAX Facility, 500,000 doses of the Sinovac vaccine, and 2 million doses of the Sputnik V vaccine within this year.

Earlier in the day, the Philippines received [two million doses of AstraZeneca COVID-19 vaccine doses](#) from the COVAX Facility.

The Philippines has reported [1,087,885 confirmed COVID-19 cases](#), of which 1,003,160 have recovered and 18,099 have died. -MDM, GMA News

4-magnitude quake hits Mulanay, Quezon

Published May 8, 2021, 4:06 PM

by [Jhon Aldrin Casinas](#)

A magnitude 4 earthquake hit Mulanay, Quezon on Saturday afternoon, May 8, the Philippine Institute of Volcanology and Seismology (Phivolcs) said.

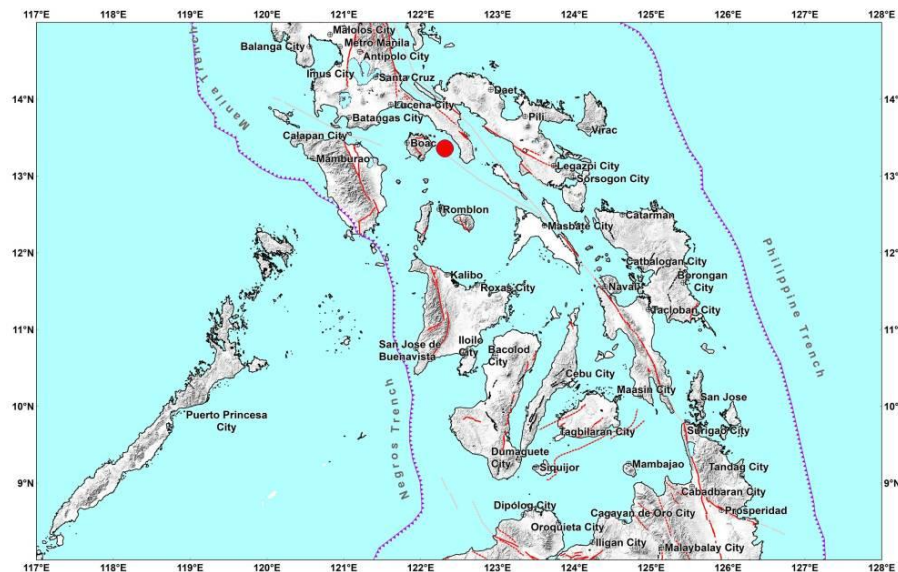

Photo from the Philippine Institute of Volcanology and Seismology (Phivolcs).

Phivolcs said the temblor took place at about 21 kilometers (km) southwest of Mulanay, Quezon at 1:03 p.m.

The quake had a depth of focus of 1 km and was tectonic in origin.

Phivolcs said Intensity IV or “moderately strong” shaking was felt in Mulanay, Quezon.

Intensity III or “weak” shaking was monitored in Catanauan, Quezon and Torrijos, Marinduque.

The agency also measured an Instrumental Intensity IV in Mulanay, Quezon.

State seismologists said they were not expecting damage to property. They said no aftershocks were expected to occur following the quake.
