I. RATIONALE

The use of information and communications technology (ICT) in government is an enabler for the nation to achieve digital transformation in the delivery of basic services. As DENR plays a pivotal role in the stewardship of the country's rich and diverse environment. Recognizing the imperative to adapt to the evolving landscape of information management and technological advancements, DENR has embarked on a strategic initiative – the Rehabilitation and Modernization of the ICT facilities in all DENR Offices.

In the case of DENR 5, it has been more than ten (10) years since their server room was established and no further improvement was made due to lack of funds. To ensure that their room is adhering to the latest industry standards both international and local, this project aims to enhance the physical environment to optimize functionality and aesthetics of their existing server room. It involves refurbishing through various improvements to its overall appearance and creating a clean, organized, and professional workspace.

TERMS OF REFERENCE

As of 16 July 2024

Procurement of ICT Services for the Rehabilitation and Modernization of the DENR Region 7 Server Room

I. RATIONALE

The use of information and communications technology (ICT) in government is an enabler for the nation to achieve digital transformation in the delivery of basic services. As DENR plays a pivotal role in the stewardship of the country's rich and diverse environment. Recognizing the imperative to adapt to the evolving landscape of information management and technological advancements, DENR has embarked on a strategic initiative – the Rehabilitation and Modernization of the ICT facilities in all DENR Offices.

In the case of DENR Region 7, it has been more than ten (10) years since their server room was established and no further improvement was made due to lack of funds. To ensure that their room is adhering to the latest industry standards both international and local, this project aims to enhance the physical environment to optimize functionality and aesthetics of their existing server room. It involves refurbishing through various improvements to its overall appearance and creating a clean, organized, and professional workspace.

In addition, the project extends its scope to rehabilitate their existing structured cabling and extend it to their hostel building where some of their offices were situated, as we acknowledge its fundamental role in fostering seamless communication within DENR Offices. Furthermore, it also includes installation of support facilities such as environmental management systems and security systems. This upgrade not only facilitates faster data transfer but also positions DENR Region 7 for future technological advancements.
